

The Daily Enterprise.

MORT L. GILMORE, Editor.
10 cents.....Per Week.
40 cents.....Per Month.

Sunday morning Rector Bleker will speak to his congregation of a matter deeply affecting its welfare. He will preach from the subject: "Two Methods of Dealing With a Difficulty." In the course of the sermon he will bring before the congregation a matter of vital importance to every member. All friends and members of the church having the prosperity of St. Marks at heart will please be present.

During the period of his imprisonment by the Filipinos, Lieutenant Gilmore and his men were at one time thrown into an old barrack with a party of Spanish prisoners, including a major general. The latter in some way obtained money which he divided among his men, and with great generosity sent fifty Mexican dollars to Lieutenant Gilmore, asking him to accept them with his compliments. Gilmore made the condition that it be considered a loan, to which the Spanish general graciously assented, and he used the money to buy shoes and clothing for his men, something they sadly needed, for they were almost naked. After his rescue Gilmore learned that the Spanish general, who had also escaped from the Filipinos, had also escaped from the Filipinos, and he offered him fifty silver dollars as a repayment of the loan. The general was quite indignant and refused to accept it. When Gilmore reminded him of the agreement he smiled and said that he had consented to it only because he feared the Americans would not accept the money otherwise. Gilmore told the story among the other naval officers at Manila, who passed around a paper and collected a handsome sum, which was expended in the purchase of the most appropriate and expensive piece of silver that could be found in Manila. It was engraved with a brief statement of facts and presented to the Spanish general with appropriate ceremonies as a token of gratitude and admiration from the navy of the United States.

THE RICE MARKET.

The turn of the week just closed was most disappointing, showing a lesser volume of business than any equal period since early January. This was further accentuated by reason of the marked contrast with the two preceding weeks, in which it appeared that the spring demand was fully entered upon. The sudden falling away in activity is attributed to the prevailing depression in other branches of trade, but is probably due more largely to contrary weather conditions. The former should have little and certainly no permanent influence upon the rice market, considering it in the light of the following: 1. Modest stocks in nearly every quarter. 2. Inadequate supply, scarce one half forward requirements. 3. Prices current, far below present cost of equal shades in foreign. Under such a combination there is a just ground for resistance on the part of holders and a sound basis for expecting lightning changes as soon as there is any sustained demand.

Quite an enquiry has developed from Porto Rico and large sales are reported. The call has been for the lower grades, such as are not in favor with distributors in the home trade. Hence the movement, while large in volume, has had but little effect on the styles ordinarily consumed in the United States. Ultimately, the removal of the depressing influence of holdings of these lower grades will benefit the whole market.

Advices from the South also disclose somewhat reactionary experiences. Sales from millers and factors of trifling proportions, the principle business mainly re-sales by speculators and other second hands. Recent advances give the latter a coveted opportunity for marketing which they are promptly improving. Better 1/2c in purse than 1/2c postponed, with the reasonable contingencies of "worm, weevil and weather." So far as can be ascertained, the supply outside first hands is limited, hence the present division regarding with indifference by those most largely interested, in other words, the general situation is strong.

Cables and correspondence from abroad note firm conditions in all English and continental markets. The stocks are far below normal and with greatly restricted movement from the far east to Europe, the outlook assures present and promises higher values.
